

ESAM

Rabbit Anti-Human ESAM pAb

Catalog No.	CPE103A	Quantity:	100 µg
	CPE103B		200 µg

Alternate Names: Endothelial cell adhesion molecule, endothelial cell-selective adhesion molecule, ESAM

Description: Rabbit Anti-Human ESAM Polyclonal Antibody is produced from sera of rabbits immunized with highly pure recombinant human soluble ESAM (Endothelial cell-Selective Adhesion Molecule). Anti-human ESAM was purified by affinity chromatography with immobilized Protein A.

Gene ID: 90952

Host: Rabbit

Immunogen: Recombinant human soluble ESAM

Formulation: Lyophilized from a solution of PBS, pH 7.4. No preservatives and carrier-free.

Purification: Protein A Chromatography

Reconstitution: Reconstituted in sterile water to a concentration of 1.0 mg/ml.

Applications: The polyclonal antibody will detect recombinant human soluble ESAM in Western blot and native ESAM in Immunohistochemistry

Application Notes: For Western blot, use at 1-5 µg/ml. Optimal dilutions should be determined by each laboratory for each application.

Storage & Stability: The lyophilized antibody is best stored desiccated at -20°C to -80°C. Reconstituted product is stable at 2-4°C for >6 months or can be stored in working aliquots at -20°C for >1 year.

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
