

Anti-CD8A monoclonal antibody, clone KT15 [Biotin]

Cat.No: CABT-45318RM

Lot. No. (See product label)

PRODUCT INFORMATION

Product Overview Rat anti mouse CD8 α , clone KT15, recognises the alpha chain of mouse CD8. CD8 is a heterodimeric protein composed of disulphide-linked CD8 α and CD8 β chains that is expressed primarily on cytotoxic T-cells. CD8 functions in the interaction with MHC Class I-bearing targets and plays a role in T-cell-mediated killing. Clone KT15 is reported to block T-cell-mediated cytotoxicity in in vitro assays. Flow Cytometry Use 10ul of the suggested working dilution to label 106 cells in 100ul. The Fc region of monoclonal antibodies may bind non-specifically to cells expressing low affinity Fc receptors.
