CERTIFICATE OF ANALYSIS

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Catalog #: A99850H **Lot #:** 5L33912

Description: Human Myeloma IgM
Human Myeloma Immunoglobulin M (IgM)

Source: Human Myeloma

Format: Purified, Liquid

Purification: The precipitin lines against goat anti-human whole serum are the same as that against goat anti-human IgM Fc5 μ fragment specific when assayed by immunoelectrophoresis at an antigen concentration equivalent to 20 mg/mL. No reaction was observed against goat anti-human IgG, Fc fragment specific; goat anti-human IgA, alpha chain specific; or goat anti-human alpha-2-macroglobulin.

Concentration: 4.6 mg/mL

Buffer: 0.01 M Sodium Phosphate, pH 7.6 containing 0.5 M Sodium Chloride.

Preservative: None

Applications: Suitable for use in Immunoelectrophoresis. Each laboratory should determine an optimum working titer for use in its particular application. Other applications have not been tested but use in such assays should not necessarily be excluded.

Storage: Upon receipt, store at 2–8°C. After opening store at 2–8°C under sterile conditions. Prepare working dilution only prior to immediate use.

Inactivation: Not Applicable
