Signal Regulatory Protein Gamma (SIRPG) Antibody

Catalogue No.:abx003661

Western blot analysis of extracts of various cell lines, using SIRPG antibody (abx003661) at 1/1000 dilution.

SIRPG Antibody is a Rabbit Polyclonal antibody against SIRPG. The protein encoded by this gene is a member of the signal-regulatory protein (SIRP) family, and also belongs to the immunoglobulin superfamily. SIRP family members are receptor-type transmembrane glycoproteins known to be involved in the negative regulation of receptor tyrosine kinase-coupled signaling processes. Alternatively spliced transcript variants encoding different isoforms have been described.
