Myelin Basic Protein (MBP) Antibody

Catalogue No.: abx025377

The protein encoded by the classic MBP gene is a major constituent of the myelin sheath of oligodendrocytes and Schwann cells in the nervous system. However, MBP-related transcripts are also present in the bone marrow and the immune system. These mRNAs arise from the long MBP gene (otherwise called 'Golli-MBP') that contains 3 additional exons located upstream of the classic MBP exons. Alternative splicing from the Golli and the MBP transcription start sites gives rise to 2 sets of MBP-related transcripts and gene products. The Golli mRNAs contain 3 exons unique to Golli-MBP, spliced in-frame to 1 or more MBP exons. They encode hybrid proteins that have N-terminal Golli aa sequence linked to MBP aa sequence. The second family of transcripts contain only MBP exons and produce the well characterized myelin basic proteins. This complex gene structure is conserved among species suggesting that the MBP transcription unit is an integral part of the Golli transcription unit and that this arrangement is important for the function and/or regulation of these genes. [provided by RefSeq]. This antibody is supplied as crude ascites.

Target:	MBP
Reactivity:	Human
Host:	Mouse
Clonality:	Monoclonal
Tested Applications:	WB, IF/ICC

Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Immunogen: Human MBP.

- Purification:** Mouse Monoclonal Antibody (Mab) supplied as crude ascites.
- Isotype:** IgM
- Conjugation:** Unconjugated
- Specificity:** Purified His-tagged MBP protein (Fragment) was used to produced this monoclonal antibody.
- Storage:** Aliquot and store at -20 °C. Avoid repeated freeze/thaw cycles.
- Swiss Prot:** [P02686](#)
- Buffer:** Mouse monoclonal antibody supplied in crude ascites with 0.09% (W/V) sodium azide.
- Note:** This product is for research use only.
