

Ubiquitin Carboxyl-Terminal Hydrolase 21 (USP21) Antibody

Catalogue No.: abx031499

USP21 is a ubiquitin-specific protease, an enzyme that removes ubiquitin from ubiquitinated proteins. The encoded protein belongs to the C19 peptidase family, also known as family 2 of ubiquitin carboxyl-terminal hydrolases. This protein has been reported to be capable of removing NEDD8 from NEDD8 conjugates.

Target: USP21**Reactivity:** Human**Host:** Rabbit**Clonality:** Polyclonal**Tested Applications:** WB**Recommended dilutions:** Optimal dilutions/concentrations should be determined by the end user.**Immunogen:** Human USP21.**Purification:** Purified Rabbit Polyclonal Antibody.**Isotype:** IgG**Conjugation:** Unconjugated**Specificity:** This USP21 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 226-256 amino acids from the Central region of human USP21.**Storage:** Aliquot and store at -20 °C. Avoid repeated freeze/thaw cycles.**Swiss Prot:** [Q9UK80](#)**Buffer:** PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, eluted with high and low pH buffers and neutralized immediately, followed by dialysis against PBS.
