Blunt Zero Cloning Kit

Catalogue No.: abx098062

Blunt Zero Cloning Vector contains a suicide gene. Ligation of PCR fragment disrupts the expression of the gene. Cells that contain non-recombinant vector are killed upon plating. High cloning efficiency. Positive clones up to 100%. Suitable for larger fragment cloning. M13 forward primer and M13 reverse primer for sequencing. T3 promoter and T7 promoter for in vitro transcription.

Target: Blunt Zero Cloning Kit

Storage: Store at -20°C. Stable for 12 months from date of receipt.

Note: This product is for research use only. This product is shipped with dry ice.
