Genomic DNA Kit

Catalogue No.: abx098076

Genomic DNA Kit provides a simple and convenient way to isolate high quality genomic DNA from a variety of mammalian cells, tissues, E.coli and yeast. Cells and tissues are enzymatically lysed. DNA is bound to silica-based column and eluted by EB or ddH₂O. The isolated DNA is suitable for PCR, restriction enzyme digestion and southern blotting.

Target: Genomic DNA Kit

Storage: Store at -20°C. Stable for 12 months from date of receipt.

Note: This product is for research use only.
