Plasmid MiniPrep Kit

Catalogue No.: abx098081

Plasmid MiniPrep Kit provides an efficient way to isolate high quality plasmid DNA from ≤ 20 ml (LB) or ≤ 4 ml bacterial cell culture, with DNA yield up to 40 μ g. Unique formulated lysis buffer and neutralization buffer permit error-free visual identification of complete bacterial cell lysis and neutralization. The purified plasmid DNA is suitable for a variety of molecular biology applications, including restriction enzyme digestion, ligation, transformation, DNA sequencing and transfection.

Target: Plasmid MiniPrep Kit

Storage: Store at -20°C . Stable for 12 months from date of receipt.

Note: This product is for research use only.
