

## **Quick Gel Extraction Kit**

Catalogue No.: abx098085

Quick Gel Extraction Kit is designed for rapid purification and recovery of DNA from TAE or TBE agarose gel. DNA is specifically bound to a silica-based column. The purified DNA is suitable for a variety of molecular biology applications, including restriction enzyme digestion, ligation, cloning, and DNA sequencing.

**Target:** Quick Gel Extraction Kit

**Storage:** Store at -20°C. Stable for 12 months from date of receipt.

**Note:** This product is for research use only.
