RNA extration Kit

Catalogue No.: abx098086

RNA extration Kit is a ready-to-use reagent for the isolation of total RNA from cells and tissues. RNA extration Kit combines phenol and guanidine thiocyanate in a mono-phase solution to inhibit RNase. After lysis and centrifugation, RNA remains in the aqueous phase and others in the interphase or organic phase. RNA is precipitated by addition of isopropanol. Pink solution for easy visualizing different phases. Unique dissolving solution for long-term RNA storage.

Target: RNA extration Kit

Storage: Store at -20°C. Stable for 12 months from date of receipt.

Note: This product is for research use only.
