

Viral DNA / RNA Kit

Catalogue No.: abx098090

Viral DNA/RNA Kit provides a fast and easy column based method to isolate viral RNA/DNA from up to 200 µl of plasma, serum, body fluid and mammalian cell supernatant. Samples are lysed with unique lysis buffer and RNA is enriched by carrier RNA. DNA/RNA is bound to silica-membrane. After washing, high quality DNA/RNA is eluted from the column. Isolated RNA is free of DNA and protein contamination, and is suitable for PCR, RT-PCR, qRT-PCR and qPCR.

Target: Viral DNA/RNA Kit

Storage: Store at -20°C. Stable for 12 months from date of receipt.

Note: This product is for research use only.
