

Apolipoprotein A1 Assay Kit

Catalogue No.: abx098409

Apolipoprotein A1 Assay Kit is an Assay Kit by Immunoturbidimetry Method.

Based on the bottle type, product model can be classified into Hitachi 7170, Hitachi 7060, Hitachi 7020, Beckman, Toshiba, Mindray, DuPont, Innova, Siemens, KHB, Abbott, Universal types, etc.

This product is used to determine APOA1 content in human serum. Mainly used for evaluation and diagnosis of lipid metabolic disorder.

The APOA1 in human serum meets the specific antibody (goat anti-human APOA1 antibody) in the liquid buffer, immediately forming antigen-antibody complex, and produce turbidity is proportional to the APOA1 concentration in the linear range. APOA1 concentration in the sample can be calculated by comparing the calibrator result with same processing.

R1: Detection Reagent 1	R2: Detection Reagent 2		
Tris buffer → 100mmol/L	Tris buffer → 100mmol/L		
PEG → 16g/l	Goat anti- human ApoA1 antibody		
Fat-removing agent	Preservatives	Preservatives
