

## Apolipoprotein E Assay Kit

Catalogue No.: abx098411

Apolipoprotein E Assay Kit is an Assay Kit by Immunoturbidimetry Method.

Based on the bottle type, product model can be classified into Hitachi 7170, Hitachi 7060, Hitachi 7020, Beckman, Toshiba, Mindray, DuPont, Innova, Siemens, KHB, Abbott, Universal types, etc.

This product is used to determine ApoE content in human serum.

The APOE in human serum meets the specific antibody (goat anti-human APOE antibody) in the liquid buffer, immediately forming antigen-antibody complex, and produce turbidity is proportional to the APOE concentration in the linear range. APOE concentration in the sample can be calculated by comparing the calibrator result with same processing.

<b>R1: Detection Reagent 1</b>	<b>R2: Detection Reagent 2</b>
Phosphate buffer → 100mmol/L	Phosphate buffer → 100mmol/L
PEG → 31g/L	Goat anti-human ApoE antibody → 14.2ml/L
Fat-removing agent → 0.7KU/L	Preservatives
Preservatives
