

IL36RN Protein

Catalogue No.: abx261609

Interleukin-36 Receptor Antagonist Protein (recombinant) is a cytokine.

Target: IL36RN

Origin: Human

Conjugation: Unconjugated

Expression: Recombinant

Swiss Prot: [Q9UBH0](#)

Sequence: The sequence of the first five N-terminal amino acids was determined and was found to be Met-Val-Leu-Ser-Gly.
