

Rat ESD shRNA Plasmid

Catalogue No.: abx988434

shRNA Plasmid to inhibit ESD expression by RNA interference. This product contains 3 separate slightly different shRNA sequences which knock down rat ESD gene specifically. Each vial contains 50 µg of lyophilized shRNA.

Target:	Rat ESD
Reactivity:	Rat
Host:	E. coli
Tested Applications:	RNAi
Form:	Lyophilized
Specificity:	ESD shRNA Plasmid (Rat) contains 3 different target-specific plasmids each encoding 19-23 nt (plus hairpin) shRNAs designed to knock down gene expression. Each plasmid contains a resistance gene for the selection of cells stably expressing shRNA.
Storage:	Store lyophilized shRNA plasmid DNA at -20 °C with desiccant. Stable for one year. Once resuspended, store at 4 °C for short term storage or -80 °C for long term storage. Avoid repeated freeze/thaw cycles.
Swiss Prot:	B0BNE5
GeneID:	290401
Gene Symbol:	ESD
Directions for use:	Resuspend lyophilized shRNA plasmid DNA in 500 µl of deionised water. Each vial contains 50 µg of lyophilized shRNA plasmid DNA. Suitable for up to 50 transfections.
Quality Control:	The sequence of shRNA is guaranteed by sequencing.
Note:	This product is for research use only.
