

## **Biotinylated Anti-Human NP-1 Antibody**

Catalog # ABG10441

#### **Specification**

Biotinylated Anti-Human NP-1 Antibody - Product Information

Application WB, E
Reactivity Human
Host Goat
Clonality Polyclonal

Biotinylated Anti-Human NP-1 Antibody - Additional Information

#### **Preparation**

Produced from sera of goats pre-immunized with highly pure (>98%) recombinant hNP-1. Anti-Human NP-1 specific antibody was purified by affinity chromatography and then biotinylated.

#### WesternBlot

To detect hNP-1 by Western Blot analysis this antibody can be used at a concentration of 0.1 -  $0.2~\mu g/ml$ . Used in conjunction with compatible secondary reagents the detection limit for recombinant hNP-1 is 1.5 - 3.0~ng/lane, under either reducing or non-reducing conditions.

#### Sandwich

To detect hNP-1 by sandwich ELISA (using  $100~\mu$ l/well antibody solution) a concentration of  $0.25-1.0~\mu$ g/ml of this antibody is required. This biotinylated polyclonal antibody, in conjunction with BioGems' Polyclonal Anti-Human NP-1 (60-251P) as a capture antibody, allows the detection of at least 0.2-0.4~ng/well of recombinant hNP-1.

### **Direct**

To detect hNP-1 by direct ELISA (using 100  $\mu$ l/well antibody solution) a concentration of 0.25 – 1.0  $\mu$ g/ml of this antibody is required. This biotinylated polyclonal antibody, in conjunction with compatible secondary reagents, allows the detection of at least 0.2 – 0.4 ng/well of recombinant hNP-1.

#### **Formulation**

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

## Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile PBS containing 0.1% BSA to a concentration of 0.1-1.0 mg/ml.

## Storage -20°C

#### **Precautions**

Biotinylated Anti-Human NP-1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

# Biotinylated Anti-Human NP-1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- <u>Immunofluorescence</u>
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
