only and not for use in diagnostic or therapeutic procedures.

TIMP4 Antibody (Center) - Protein Information

Name TIMP4

Function

Complexes with metalloproteinases (such as collagenases) and irreversibly inactivates them by binding to their catalytic zinc cofactor. Known to act on MMP-1, MMP-2, MMP-3, MMP-7 and MMP-9.

Cellular Location

Secreted.

Tissue Location

Abundant in heart and present at low levels in many other tissues

TIMP4 Antibody (Center) (Cat. #AP10148c) immunohistochemistry analysis in formalin fixed and paraffin embedded mouse heart tissue followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of the TIMP4 Antibody (Center) for immunohistochemistry. Clinical relevance has not been evaluated.

TIMP4 Antibody (Center) - Background

This gene belongs to the TIMP gene family. The proteins encoded by this gene family are inhibitors of the matrix metalloproteinases, a group of peptidases involved in degradation of the extracellular matrix. The secreted, netrin domain-containing protein encoded by this gene is involved in regulation of platelet aggregation and recruitment and may play role in hormonal regulation and endometrial tissue remodeling.
