

PGBD2 Antibody (N-term) Blocking peptide
Synthetic peptide
Catalog # BP10319a

Specification

PGBD2 Antibody (N-term) Blocking peptide - Product Information

Primary Accession [Q6P3X8](#)
Other Accession [NP_733843.1](#),
[NP_001017434.1](#)

PGBD2 Antibody (N-term) Blocking peptide - Additional Information

Gene ID 267002

Other Names

PiggyBac transposable element-derived protein 2, PGBD2

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

PGBD2 Antibody (N-term) Blocking peptide - Protein Information

Name PGBD2

PGBD2 Antibody (N-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

PGBD2 Antibody (N-term) Blocking peptide - Background

The piggyBac family of proteins, found in diverse animals, are transposases related to the transposase of the canonical piggyBac transposon from the moth, *Trichoplusia ni*. This family also includes genes in several genomes, including human, that appear to have been derived from the piggyBac transposons. This gene belongs to the subfamily of piggyBac transposable element derived (PGBD) genes. The PGBD proteins appear to be novel, with no obvious relationship to other transposases, or other known protein families. The exact function of this gene is not known. Two transcript variants encoding different isoforms have been found for this gene.
