**I2BP2 Antibody (Center) Blocking Peptide -
Protein Information**

Name IRF2BP2

Function

Acts as a transcriptional corepressor in a IRF2-dependent manner; this repression is not mediated by histone deacetylase activities (PubMed:12799427). Represses the NFAT1-dependent

**I2BP2 Antibody (Center) Blocking Peptide -
Background**

IRF2BP2 encodes an interferon regulatory factor-2 (IRF2)binding protein that interacts with the C-terminal transcriptional repression domain of IRF2. Alternative splicing results in multiple transcript variants encoding distinct isoforms. [provided byRefSeq].
