

ZNF331 Antibody (N-term) Blocking Peptide

Synthetic peptide Catalog # BP17672a

Specification

ZNF331 Antibody (N-term) Blocking Peptide - Product Information

Primary Accession Q9NQX6

ZNF331 Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 55422

Other Names

Zinc finger protein 331, C2H2-like zinc finger protein rearranged in thyroid adenomas, Zinc finger protein 361, Zinc finger protein 463, ZNF331, RITA, ZNF361, ZNF463

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ZNF331 Antibody (N-term) Blocking Peptide - Protein Information

Name ZNF331

Synonyms RITA, ZNF361, ZNF463

Function

May be involved in transcriptional regulation. May play a role in spermatogenesis.

Cellular Location

ZNF331 Antibody (N-term) Blocking Peptide - Background

Zinc finger proteins have been shown to interact withnucleic acids and to have diverse functions. The zinc finger domainis a conserved amino acid sequence motif containing 2 specificallypositioned cysteines and 2 histidines that are involved incoordinating zinc. Kruppel-related proteins form one family of zincfinger proteins. See ZFP93 (MIM 604749) for additional informationon zinc finger proteins.
