

**GSC Antibody (N-term) Blocking Peptide**  
Synthetic peptide  
Catalog # BP18734a**Specification****GSC Antibody (N-term) Blocking Peptide - Product Information**Primary Accession [P56915](#)**GSC Antibody (N-term) Blocking Peptide - Additional Information**

Gene ID 145258

**Other Names**

Homeobox protein goosecoid, GSC

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**GSC Antibody (N-term) Blocking Peptide - Protein Information**

Name GSC

**Function**

Regulates chordin (CHRD). May play a role in spatial programming within discrete embryonic fields or lineage compartments during organogenesis. In concert with NKX3-2, plays a role in defining the structural components of the middle ear; required for the development of the entire tympanic ring (By similarity). Probably involved in the regulatory networks that define neural crest cell fate specification and determine mesoderm cell lineages in

**GSC Antibody (N-term) Blocking Peptide - Background**

This gene encodes a member of the bicoid subfamily of the paired (PRD) homeobox family of proteins. The encoded protein acts as a transcription factor and may be autoregulatory. A similar protein in mice plays a role in craniofacial and rib cage development during embryogenesis.
