## Phospho-HSL (Ser855/554) Ab

Cat.#: AF3402 Concn.: 1mg/ml Mol.Wt.: 81+83kDa Size: 100ul,200ul Source: Rabbit Clonality: Polyclonal

Application: WB 1:500-1:2000 IHC 1:50-1:200, IF/ICC 1:100-1:500

Reactivity: Human, Mouse, Rat

Purification: The Ab is from purified rabbit serum by affinity purification

via sequential chromatography on phospho- and non-

phospho-peptide affinity columns.

Specificity: Phospho-HSL (Ser855/554) Ab detects endogenous levels of

HSL only when phosphorylated at Serine 855/554.

Immunogen: A synthesized peptide derived from human HSL around the

phosphorylation site of Serine 855/554.

Uniprot: Q05469

Description: hormone sensitive lipase is a lipolytic enzyme of the 'GDXG'

family. Plays a rate limiting step in triglyceride lipolysis. In adipose tissue and heart, it primarily hydrolyzes stored triglycerides to free fatty acids, while in steroidogenic tissues, it principally converts cholesteryl esters to free

cholesterol for steroid hormone production.

Subcellular Location: Cell membrane. Membrane > caveola. Cytoplasm > cytosol.

Found in the high-density caveolae. Translocates to the cytoplasm from the caveolae upon insulin stimulation.

Similarity: Belongs to the 'GDXG' lipolytic enzyme family.

Storage Condition and

Buffer:

Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at -20

°C.Stable for 12 months from date of receipt.

Western blot analysis of HSL phosphorylation expression in Adriamyci treated HeLa whole cell lysates,The lane on the left

is treated with the antigen-specific peptide.

AF3402 at 1/100 staining Human prostate tissue by IHC-P. The sample was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The sample was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

AF3402 at 1/100 staining human colon carcinoma tissues sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hou

AF3402 staining HeLa cells by IF/ICC. The sample were fixed with PFA and permeabilized in 0.1% Triton X-100,then blocked in 10% serum for 45 minutes at 25°C. The primary Ab was diluted at 1/200 and incubated with the sample for 1 hour at 37°C. An Alexa Fluor 594 conjugated goat anti-rabbit IgG (H+L) Ab(Cat.# S0006), diluted at 1/600, was used as secondary Ab.

<code>IMPORTANT:</code> For western blot, incubate membrane with diluted primary Ab in 5% w/v milk , 1X TBS, 0.1% Tween@20 at 4°C with gentle shaking, overnight.
