

Rat Monoclonal anti Mouse Reg3D

ORDERING INFORMATION

Catalog No:	mAP-0516
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant Mouse Reg3D
Ig Type:	Rat IgG2
Clone:	RM0516-24Q6
Applications:	IHC-F

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a rat immunized with recombinant mouse Reg3D (regenerating islet-derived III delta). Reg3D is also called INGAPrP (islet neogenesis-associated protein-related protein) and is an ~20 kDa member of the Reg family of secreted calcium-dependent C-type lectins.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500ul sterile PBS and the final concentration is 200ug/ml. Reconstituted antibody can also be aliquoted and stored frozen at <-20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes mouse Reg3D by ELISAs.

Applications:

1.	IHC-F	Yes	1:100-200
----	-------	-----	-----------

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
