

CD45RB, clone MEM-55 Monoclonal Antibody

Catalog No.: MON1153

Quantity: 1 ml

Specificity

CD45RB is present on B-cells, a subpopulation of T-cells, monocytes, macrophages and granulocytes. This antibody reacts with a carbohydrate epitope of CD45RB, a sialidase sensitive epitope which is expressed on most PBL.

Immunoglobulin type

Murine IgG1

Use

This antibody is very useful for:

- Immunofluorescence detection of CD45RB positive cells.
- Western blotting (reduced and non-reduced).
- Immunoprecipitation.

Instructions for use

Advised working dilution is 1:10.

Presentation

1 ml. diluted ascites in PBS with 0.1% sodium azide.
