

Native Bovine Cholesterol Concentrate

Catalog No.	CSI19628A	Quantity:	5 g
	CSI19628B		20 g

Description: Bovine Cholesterol Concentrate is a concentrated cholesterol additive consisting mainly of bovine high density lipoproteins. The lipoproteins are substantially free of other serum proteins. Typical cholesterol concentrations are in the range of 6000 to 8000 mg/dL. Cholesterol concentrations may be adjusted to customer's specifications. Bovine Cholesterol Concentrate is used by several leading US diagnostic manufacturers in preparing lyophilized and liquid cholesterol controls.

Concentration: 3000-7000 mg/dL

Source: Bovine Serum

Formulation: Frozen Liquid without preservatives

Storage & Stability: Store at -70°C. 1 year.

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
