## Product Data Sheet

Western blot analysis of Glucagon Receptor expression in PC12 (A), Jurkat (B) whole cell lysates.

Immunohistochemical analysis of Glucagon Receptor staining in human liver cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. AEC was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
