

C1q removed Human Complement Serum

Cat. No.: CTS-036

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview This product is a C1q removed human complement serum via immunoaffinity chromatography. It can be used for testing the absence of C1q by functional assays for classical pathway activity. It can be reconstituted by addition of purified C1q protein. This product is for research use only and is not intended for therapeutic or diagnostic applications.

SPECIFICATIONS

| | |
|----------------------------|--|
| Specie Reactivity | Human |
| Type | Serum |
| Application | Functional Assays |
| Product Form | Frozen liquid |
| Storage | Store at -80°C. Avoid repeated freeze/thaw cycles. |
| Complement Activity | Depleted Special Protein |
