

C2 removed Human Complement Serum

Cat. No.: CTS-039

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview This product is a C2 removed human complement serum via immunoaffinity chromatography. It can be used for testing the absence of C2 by functional assays for classical pathway activity. It can be reconstituted by addition of purified C2 protein. This product is for research use only and is not intended for therapeutic or diagnostic applications.

SPECIFICATIONS

Specie Reactivity	Human
Type	Serum
Application	Functional Assays
Product Form	Frozen liquid
Storage	Store at -80°C. Avoid repeated freeze/thaw cycles.
Complement Activity	Depleted Special Protein
