

Absolute Mag™ SARS-CoV-2 Spike protein RBD Conjugated Magnetic Particles

Cat.No: WHM-AB05

DESCRIPTION

Description Absolute Mag™ SARS-CoV-2 Spike protein RBD Conjugated Magnetic Particles (# WHM-AB05 #) are obtained by coupling the biotinylated SARS-CoV-2 Spike RBD protein to streptavidin conjugated magnetic particles, which can capture the Anti-SARS-CoV-2 antibody or ACE2 protein from cell or serum sample and easily to follow up with other tests, such as immunocapture, biopanning and flow cytometry. These magnetic particles will be supplied as lyophilized powder (from 0.22 µm filtered PBS pH7.4 including 0.05% Tween-20 and 10% trehalose).

PRODUCT INFORMATION

| | |
|------------------------------|--|
| Particle Size | 2 µm |
| Ligand | SARS-CoV-2 Spike protein RBD |
| Concentration | N/A |
| Species Reactivity | SARS-CoV-2 |
| Usage Statement | a) Reconstitute the magnetic particles, wash the particles and suspended to 1 mg/mL by ultrapure water. b) Add your antibody or ACE-2 protein to the particles, incubation and wash the particles. |
| Binding Capacity | >40 µg anti-SARS2-CoV-2 Spike S1 antibody/mg particles; >40 µg ACE2 protein / mg particles |
| Surface Group Density | >318 pmol (40 µg) Spike RBD/mg particles |

STORAGE AND SHIPPING

Storage

Upon receipt, please store the particles at -20°C for 1 year in lyophilized state. Once the particles reconstitution, please use it immediately. Do not to freeze thaw the particles after reconstitution.
