Immunogen	Recombinant Human Vesicle transport through interaction with t-SNAREs homolog 1B protein (2-208AA)
Raised In	Rabbit
Species Reactivity	Human
Tested Applications	ELISA
Relevance	V-SNARE that mediates vesicle transport pathways through interactions with t-SNAREs on the target membrane. These interactions are proposed to mediate aspects of the specificity of vesicle trafficking and to promote fusion of the lipid bilayers. May be concerned with increased secretion of cytokines associated with cellular senescence.
