	 <p>The image shows a Western blot analysis of LOVO cells. On the left side, there is a molecular weight marker in kilodaltons (kDa) with values 100, 70, 55, 40, 35, and 25. The label 'LOVO' is positioned above the blue gel lane. A single, dark, horizontal band is visible within the lane, positioned between the 35 and 40 kDa markers, indicating the presence of the target protein.</p>
