

GGT1 Polyclonal Antibody

Catalog Number: E91776
Amount: 100ul

Background: The enzyme encoded by this gene catalyzes the transfer of the glutamyl moiety of

glutathione to a variety of amino acids and dipeptide acceptors. The enzyme is composed of a heavy chain and a light chain, which are derived from a single precursor protein, and is present in tissues involved in absorption and secretion. This enzyme is a member of the gamma-glutamyltransferase protein family, of which many members have not yet been fully characterized and some of which may represent pseudogenes. This gene is classified as type I gamma-glutamyltransferase. Multiple alternatively spliced variants, encoding the

same protein, have been identified. [provided by RefSeq, Oct 2008]

Species: Rabbit **Isotype:** IgG

Storage/Stability: Store at -20oC or -80oC. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide,

50% glycerol, pH7.3.

Synonyms: GGT; GTG; CD224; GGT 1; D22S672; D22S732;

Immunogen: Recombinant proteinof human GGT1

Purification: Affinity purification

Reactivity: H M R
Applications: WB IHC
Molecular Weight: 60kDa
Swiss-Prot No.: P19440

Gene ID: 2678
