

# Murinized anti-Mouse PD-1 (RMP1-14) Recombinant Antibody

## Murinized anti-Mouse PD-1 (RMP1-14) Recombinant Antibody

### Product Benefits:

This antibody is a recombinant version of ichorbio's bestselling RMP1-14 clone. We have switched out the original rat constant region and converted it to a murine constant region.

ichorbio's mouse anti-mouse PD-1 antibody (RMP1-14) is manufactured in a cGMP compliant facility. Click [here](#) for ichorbio's RMP1-14 antibodies and [here](#) to view ichorbio's complete list of anti-PD-1 antibodies and biosimilars. ichorbio: the best antibodies for *in vivo* research.

### Size:

ICH1182 mouse anti-mouse RMP1-14 is available in the following sizes: 5mg, 25mg, 50mg and 100mg

### Target:

PD-1

### Clone:

RMP1-14

### Isotype:

Mouse IgG2a

### Other Names:

Programmed cell death protein 1, Pcd1, CD279

### Uniprot:

[Q02242](#)

### Host:

HEK293 cells

### Species Reactivity:

Mouse

**Specificity:**

Muritized anti-mouse PD-1 antibody (RMP1-14) recognizes an epitope on Mouse PD-1

**Purification Method:**

This recombinant antibody was purified using multi-step affinity chromatography methods such as Protein A or G depending on the species and isotype.

**Antigen Distribution:**

Subset of double negative thymocytes, activated T and B cells

**Background:**

CD279, also known as programmed death-1 (PD-1) is a 50-55 kD immunoglobulin superfamily member. PD-1 is expressed on a subset of CD4-CD8- thymocytes, and on activated T and B cells. The PD-1 ligands, PD-L1 (also known as B7-H1) and PD-L2 (B7-DC), are members of the B7 immunoglobulin superfamily. This RMP1-14 antibody has been reported to block the binding of PD-1 to its ligands (B7-H1 and B7-DC) and to inhibit T cell proliferation and cytokine production.

**Immunogen:**

Mouse PD-1 transfected BHK cells

**Concentration:**

1.0 - 5.0 mg/ml

**Formulation:**

0.01 M phosphate buffered saline (PBS) pH 7.2, 150 mM NaCl with no carrier protein, potassium or preservatives added. BSA and Azide free.

**Purity:**

>95% by SDS-PAGE and HPLC

**Endotoxin:**

? 1.0 EU/mg as determined by the LAL method

**Storage:**

This antibody is stable for at least 4 weeks when stored at 2-8°C. For long term storage, aliquot in working volumes without diluting and store at -20°C or -80°C. Avoid repeated freeze thaw cycles.

## Applications:

Western Blot, Blocking, Flow Cytometry, Functional Assays

## Use:

Products are for research use only.

## Fc Silenced version:
