

CD3d / CD3 delta Antibody, Mouse MAb

Sino Biological
Biological Solution Specialist

Catalog Number: 10981-MM06

GENERAL INFORMATION

Immunogen:	Recombinant Human CD3d / CD3 delta protein (Catalog#10981-H08H)
Preparation	This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified, recombinant Human CD3d / CD3 delta (rh CD3d / CD3 delta; Catalog#10981-H08H; NP_000723.1; Met 1-Ala 105). The IgG fraction of the cell culture supernatant was purified by Protein A affinity chromatography.
Ig Type:	Mouse IgG1
Clone ID:	6B1C12F3
Specificity:	Human CD3d / CD3 delta
Formulation:	0.2 µm filtered solution in PBS
Storage:	This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free. Sodium azide is recommended to avoid contamination (final concentration 0.05%-0.1%). It is toxic to cells and should be disposed of properly. Avoid repeated freeze-thaw cycles.

APPLICATIONS

Applications:	IHC-P
----------------------	-------

RECOMMENDED CONCENTRATION

IHC-P	IHC-P: 1:50-1:200
--------------	-------------------

Please Note: Optimal concentrations/dilutions should be determined by the end user.

Catalog Number: 10981-MM06

Immunochemical staining of human CD3D in human tonsil with mouse Mab (1:60, formalin-fixed paraffin embedded sections). Positive staining was localized to membrane of T cells. The left panel: tissue incubated with primary antibody; The right panel: tissue incubated with the mixture of primary antibody and antigen (recombinant protein).

Immunochemical staining of human CD3D in human spleen with mouse Mab (1:60, formalin-fixed paraffin embedded sections). Positive staining was localized to membrane of T cells.
